PROFESSIONAL SUMMARY

A results-driven **Software Engineer & Backend / Python API Developer** with 7+ years of hands-on experience in designing, developing, and optimizing scalable enterprise web, mobile, and API applications. Specialized in **PHP (Laravel, Symfony)**, **Python (FastAPI, Django)**, **Flutter Mobile Development**, and **Cloud Optimization (AWS)**, with a strong focus on performance tuning, code optimization, and system scalability.

Expert in building high-performance async REST APIs with **FastAPI** and robust backends with **Django REST Framework**. Experienced in **SaaS development**, **Stripe billing & subscriptions**, **automation workflows** using Celery & Python, and delivering high-performance, secure, and maintainable solutions.

Proficient across the full development lifecycle (SDLC), with solid expertise in Java, Python, and the full JavaScript stack, along with Agile methodologies, API integrations, and database optimization. Passionate about writing clean, efficient code and continuously adopting modern technologies to drive business success.

TECHNICAL EXPERTISE

PHP Ecosystem

Laravel, Symfony, Core PHP, Doctrine ORM, WordPress

Frontend & JS Stack

React.js, Vue.js, Node.js, Bootstrap, JavaScript, jQuery, Ajax

Programming Languages

Python, Java, Go, PHP, SQL

SaaS & Payments

Stripe, SaaS Architecture, Subscriptions, Webhooks, Payment Gateways

Python API & Automation

FastAPI, Django, Django REST Framework, Celery, Stripe API, Scrapy

Mobile Development

Flutter, Dart, Android Native

Databases

MySQL, PostgreSQL, MongoDB, SQLite, Redis

DevOps & Tools

AWS, Docker, Linux, Git, Jira, Bitbucket, Third-party APIs

EXPERIENCE

Software Engineer & Backend / Python API Developer - Vivan Web Solution Pvt Ltd Dec 2021 - Present

- Spearheaded end-to-end development of enterprise-grade web applications using PHP frameworks and modern JavaScript.
- Built high-performance async REST APIs using **FastAPI** and robust backends with **Django REST Framework**; developed SaaS platforms with **Stripe** billing & subscription management.
- Designed and maintained scalable database schemas and refactored legacy codebases to improve performance by over 30%.
- Created Python-based automation scripts, Celery task queues, and data pipelines for business workflow automation.
- Collaborated directly with stakeholders for project scope, sprint planning, and implemented standards compliance.

FEATURED PROJECTS

National Sports Id

PHP & MySQL

[Software Engineer](#) | [Team Size: 5](#)

Major sports platform facilitating league administration for thousands of users. Streamlined creating leagues, teams, and managing players and coaches.

- Automated match sheet generation and ID printing, reducing manual administrative workload.
- Implemented multi-step verification and secure payment gateways, increasing platform trust and revenue.

MobileMoxie

React JS & Symfony

[Software Engineer](#)

Comprehensive mobile SEO and ASO toolset with dynamic UI and robust backend services.

- Built dynamic user interfaces using React JS.
- Developed robust backend services with Symfony, PHP, and MySQL.

Capexplan

Symfony 2, React.js

[Software Engineer](#)

Capital expenditure management software for enterprise-level financial planning.

- Implemented sales and purchase management and budget approval workflows.
- Developed comprehensive capex tracking and reporting modules.

B2B Banking Portal

Vue.js & Laravel

[Software Engineer](#)

Enterprise admin panel for banking operations with advanced data visualization.

- Integrated Chart.js for real-time financial analytics.
- Ensured secure management of banking operations.

Wall Street Italia

Symfony & WordPress

[Software Engineer](#)

Financial news and analysis platform.

- Leveraged Symfony and WordPress to build robust web solutions.
- Optimized performance using PHP and MySQL.

UTT Project

Symfony Framework

[Software Engineer](#)

Maintained and developed the UTT project ensuring high scalability.

- Focused on backend optimization using Symfony and Doctrine.

Transportation Advisory

PHP & MySQL

[Software Engineer](#) | [Team Size: 3](#)

Transportation product management system for creating employees and sub-users.

FastAPI SaaS Platform

Python & FastAPI

[Backend / Python API Developer](#)

Multi-tenant SaaS platform with async REST APIs, Stripe subscription billing, and automated workflows.

- Built async REST endpoints with FastAPI; integrated Stripe checkout, webhooks & subscription tiers.
- Implemented JWT auth, RBAC, background tasks with Celery & Redis; deployed on AWS with Docker.

Django Automation Suite

Python & Django

Backend / Python API Developer

Django-based automation suite for data scraping, pipelines, scheduled reporting, and REST API integrations.

- Developed Django REST Framework APIs and automated data collection pipelines using Scrapy & Celery.
- Built admin dashboards and scheduled task management for business workflow automation.

EDUCATION

Bachelor of Computer Application - Sardar Patel University

2021

CGPA: 9.42 (Grade A)

Higher Secondary (12th Science) - Madhavlal Shah High School

2018

Grade B (68%)

Secondary School (10th SSC) - Madhavlal Shah High School

2016

Grade B (47%)

PERSONAL INFORMATION

Date of Birth

02-Mar-2001

Nationality

Indian

Languages

English, Hindi, Gujarati
