PROFESSIONAL SUMMARY

An experienced **Freelance Software Engineer** with over 4 years of expertise in delivering custom web and mobile solutions to clients worldwide. Specializing in **PHP (Laravel, Symfony)**, **Flutter Mobile Development**, and **Cloud Infrastructure (AWS)**, I help businesses turn their ideas into scalable, high-performance applications.

I not only write clean, efficient code but also provide comprehensive consultation on system architecture and product strategy. My freelance practice is built on reliable communication, timely delivery, and a commitment to understanding the unique business goals of each client. Whether it's building a new MVP or optimizing an existing enterprise system, I deliver results that drive growth.

Proficient in handling the full development lifecycle (SDLC) independently, from requirement gathering to deployment and maintenance. My technical stack includes extensive experience with Java, Python, and modern JavaScript frameworks, ensuring I can adapt to any project requirement.
